**Coro Energy Plc**  
("Coro" or the "Company")

**Second Philippines 100MW WESC Application Submission**

Coro Energy PLC, the South East Asian energy company with a natural gas and clean energy portfolio, announces that it has submitted an application to the Philippines Department of Energy ("DoE") for a second c.100MW Wind Energy Service Contract ("WESC").

Following a successful pre-application process, Coro has now submitted a second application for a WESC for its next wind turbine project, located in Oslob, Cebu. This second area of interest neighbours the Company's first project site and would be in respect of an additional installed capacity of circa 100MW. The recently installed and operational 130 metre meteorological mast installed by the Company in the Philippines will also serve this second project, gathering data over the next twelve months and determining the wind resource available.

Further updates will be provided, as appropriate, once DoE has evaluated the application.
