Successful Second Philippines WESC Award

Coro Energy PLC, the South East Asian energy company with a natural gas and clean energy portfolio, announces that its application for a Wind Energy Service Contract ("WESC") in respect of a second area of interest for the onshore Oslob Wind Power Project, previously announced by the Company on 11 March 2024, has now been approved by the Philippines Department of Energy.

This WESC is Coro's second contract and neighbours the Company's first project site and would be in respect of an additional installed capacity of circa 100MW. The recently installed and operational 130 metre meteorological mast installed by the Company in the Philippines will also serve this second project in gathering data and determining the wind resource available.
